

1- History:

m4 da tb3 el history?

GET /api/user/{user_id}/upvoted

y3ni homa (recent, upvoted, downvoted, and hidden) m4 bs upvoted.

2- Subreddit:

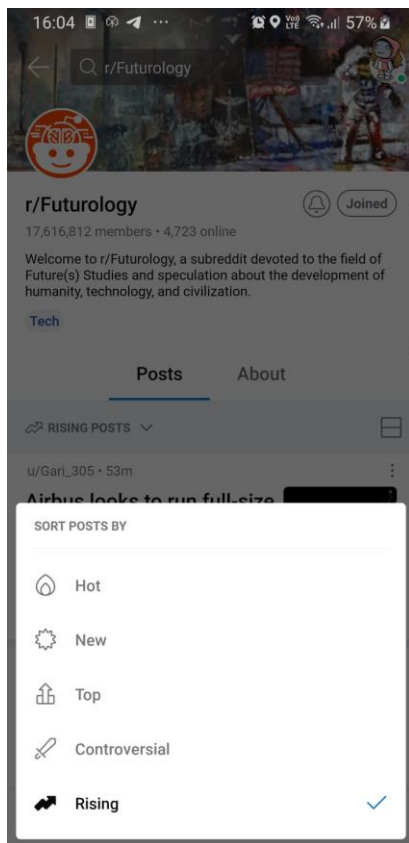

- The user can join or leave subreddit using subreddit name
- Get if the user joined the subreddit not, also if mod or not (when get subreddit), may be a new end point but also, using the name of subreddit. You may change get subreddit by name body to contain subreddit id, thus the end points can use subreddit id.

GET /api/subreddit/{subreddit}/hot

GET /api/subreddit/{subreddit}/new

GET /api/subreddit/{subreddit}/top

+ rising + controversial
